DISCLAIMER

The information shared in this whitepaper is not all-encompassing or comprehensive and does not in any way intend to create or put into implicit effect of any elements of a contractual relationship. The primary purpose of this whitepaper is to provide potential token holders with pertinent information in order for them to thoroughly analyse the project and make an informed decision before investing. Prior to your participation in Secured Marsupial, we strongly advocate a careful study of this whitepaper.

TABLE OF CONTENTS

1 ABSTRACT

Cryptoasset trading is still not a mainstream investment offered by the big trading houses, "Meme" coin investors continue to often lose money on rug pulls and or hidden team owned tokens thus manipulting the market.

Secured Marsupial has been created by one dev with the sole purpose to be a community incentivised token and prove to the world that this "Meme" coin is way more than one of the many other projects out in the crypto space.

The dev and community mod teams' vision are to implement revolutionary utility to Secured Marsupial.

The dev finds it of the highest importance to state complete transparency and therefore has stepped out of anonymity within the community and proven anything stated.

Honesty and transparency are very important and the dev may be held to his word by anything stated exclusively in this white paper.

The most exciting aspects Secured Marsupial have implemented in their contract are the redistribution mechanisms which redistributes a total of 8% of every buy or sell transactions. It directly rewards 4% to existing holders calculated based on the size of the transaction and then distributes this to Secured Marsupial holders to the size of the individuals holdings, 4% is automatically being redistributed back to the lp pool to add back to the liquidity.

2 VALUES

- ## Security

  Security of our holders' tokens is the upmost importance and we hold strong value to our securities implemented in Secured Marsupial.

- ## Transparency

  Complete transparency is what we aim for, we provide proof for everything stated and the dev is notanonymous.

- ## Trust

  By showing complete transparency, proven tokenomics and a community team working around the clock, we aim to instill confidence in all our holders and new potential buyers and gain the full trust of the Secured Marsupial team.

- ## Longevity

  It should not come as a surprise to anyone that we are here to stay and we are confident that with our amazing community we are going to see a bright and profitable future.

- # $SMARSUP TOKEN

$SMARSUP is a BEP-20 token launched on the 5th of May, 2021.
SMARSUP Contract Address :
 0x2aada8138787eb7a8907232da6756c6ac6186ef2

The max supply is 1 Quadrillion $SMARSUP of which only 2.5% will be held by the dev and only 5% has been airdropped to the team divided between 20 mods which were the first engaging community members.

Key functionalities of SMARSUP are its built-in redistribution mechanisms.
For every transaction, either buy or sell, holders get rewarded SMARSUP thus their wallets will increase over time.

Upon listing on Pancake swap the dev has locked 40% of LP POOL tokens for 1 year in dx.app.

- 40% of tokens were burnt to a dead address upon listing on PancakeSwap V2.
- The Devs wallet will not sell and continue to hold and burn until 2.5% has been reached.
- The anti-whaling system protects our holders against bigsells and gives more power to smaller holders.

- # PANCAKE SWAP EXCHANGE

PancakeSwap is a premier decentralized exchange for swapping BEP20 tokens on Binance Smart Chain. PancakeSwap uses an automated market maker (AMM) model where users trade against a liquidity pool. Such pools are filled with users' funds. They deposit them into the pool, receiving liquidity provider (or LP) tokens in return. They can use those tokens to reclaim their share, plus a portion of the trading fees. PancakeSwap is growing rapidly and reaches volume of close to 300 Million daily.

- # SMART CHAIN BLOCKCHAIN

$SMARSUP was launched on the BEP-20 blockchain. The low transaction cost and the rapid growth of PancakeSwap made us choose Smart chain. The Smart Chain Network provides us with many revolutionizing utilities for $SMARSUP and we look forward to the future in giving our token utilities.

ABOUT $SMARSUP TOKEN
$SMARSUP is a BEP-20 token launched on the Smart Chain blockchain May 5, 2021.

KEY DETAIL

•	Token Symbol	Smarsup
•	Max Supply	1.000.000.000.000.000
•	Token Sent To Dead Address	40%
•	LP Tokens Locked In Dx	40%

ANTI WHALE SYSTEM TRANSACTIONS CAN NOT EXCEED 0.5% OF TOTAL SUPPLY 8% TOTAL REDISTRUBUTION. 4% OF EACH TRANSCATION IS DISTRUBUTED AMONG ALL EXISTING HOLDERS. 4% OF EACH TRANSACTION GETS ADDED BACK AUTOMATICALLY IN
TO THE LP POOL ON PancakeSwap V2.

• Redistribution Mechanism

Key features of this token are its built-in 4% redistribution mechanism to all holders as a reward meaning their wallets will increase over time.
The 4% Automatic LP ensures buyers and holders that there will be sufficient liquidity in the DEX.

• Liquidity lock:

The dev has locked 40% of LP tokens for 1 year thus ensuring to holders and buyers that there is no risk off a 'rug pull' (the ability for a malicious actor to pull out the liquidity for themselves) this provides our investors with additional security
